

LISTING OF CLAIMS

1(cancelled).

2(currently amended). A tape, sheet or film composition comprising a combination comprising at least one polymer selected from the group of ethylene acrylic copolymers, fluoropolymers, ethylene functional polymers, grafted EPDM, EPDM functional polymers, styrene block copolymers and nitrile functional rubbers; at least one bitumin, [and] at least one passivating agent and at least one reinforcement.

3(currently amended). A high temperature resistant tape, sheet, film or wrap composition for a metallic pipe comprising a combination comprising at least one polymer, gilsonite, [and] at least one silicate and at least one reinforcement. p5

4(original). The composition of Claim 2 wherein the polymer comprises EPDM.

5(cancelled).

6(original). The composition of Claim 2 wherein said polymer comprises at least one EPDM functional polymer, said bitumin comprises gilsonite and said passivating agent comprises at least one silicate.

7(original). The composition of Claim 3 wherein said silicate comprises calcium silicate.

8(original). The composition of Claim 6 wherein said at least one silicate comprises calcium silicate.

9(cancelled).

10(original). The composition of Claim 3 wherein said polymer comprises at least one member selected from the group consisting of epoxy functional, hydroxyl functional and acrylic functional polymers.

11(Amended). The composition of Claim 10 further comprising ethylene vinyl acetate.

12(cancelled).

13(currently amended). The composition of Claim 2 [further comprising] wherein said at least one reinforcement comprises at least one member selected p5

from the group consisting of a scrim, web, matte, mesh, perforated films and woven assemblages.

14(currently amended). The composition of Claim 3 [further comprising] wherein said at least one reinforcement comprises at least one member selected from the group consisting of a scrim, web, matte, mesh, perforated films and woven assemblages.

15(original). The composition of Claim 2 further comprising a film upon at least a portion of one surface of said composition.

16(original). The composition of Claim 2 further comprising at least one expansion agent.

17(original). The composition of Claim 2 further comprising at least one thermosetting compound and at least one curing agent for said compound.

18(original). The composition of Claim 2 wherein said polymer comprises at least one radiation curable polymer and at least one photo-initiator.

19(cancelled).

20(cancelled).

21(previously added). A tape, sheet or film composition comprising a combination comprising at least one polymer selected from the group of ethylene acrylic copolymers, fluoropolymers, ethylene functional polymers, grafted EPDM, EPDM functional polymers, styrene block copolymers and nitrile functional rubbers; at least one bitumin, and at least one passivating agent and wherein said composition is at least partially in contact with a reinforcement defining a plurality of openings and comprising at least one member selected from the group consisting of a scrim, web, matte, mesh, and perforated films.

22(previously added). The composition of Claim 21 further comprising a removable release film.

23(previously added). The composition of Claim 21 wherein said at least one polymer comprises at least one thermosetting polymer and further comprising at least one heat activated curing agent.

24(previously added). The composition of Claim 21 said at least one passivating agent comprises at least one silicate.

25(previously added). The composition of Claim 23 wherein said at least one heat activated curing agent comprises dicyandiamide.

26(previously added). The composition of Claim 24 wherein the silicate comprises calcium silicate.

27(previously added). The composition of Claim 24 wherein the silicate comprises sodium silicate.

28(previously added). The composition of Claim 26 wherein said bitumen comprises gilsonite.

29(cancelled).

~~30(new). A tape, sheet or wrap composition comprising a combination comprising at least one polymer selected from the group of silicone and silicone functional polymers, fluoropolymers and ethylene functional polymers; at least one resin, at least one bitumin, and at least one passivating agent and wherein said composition is at least partially in contact with a reinforcement defining a plurality of openings.~~

31(new). The composition of Claim 30 wherein the polymer comprises an ethylene functional polymer comprising at least one ethylene acrylic.

32(new). The composition of Claim 30 wherein the passivating agent comprises at least one silicate and the bitumen comprises gilsonite.

33(new). The composition of Claim 30 wherein the resin comprises at least one polybutadiene.

34(new). The composition of Claim 30 wherein at least a portion of the composition contacts a removable release film.

35(new). The composition of Claim 30 wherein the reinforcement comprises at least one member selected from the group consisting of a scrim, web, matte, mesh, perforated film and woven assemblage.

36(new). The composition of Claim 35 wherein the reinforcement comprises at least one member selected from the group consisting of fiberglass, and polyester polypropylene.

37(new). The composition of Claim 36 wherein the reinforcement comprises polyester.
